IN THE CLAIMS

Please amend the claims as follows:

Claims 1-35: (Cancelled).

36. (Currently Amended) An optical information recording medium, comprising:

a substrate and

a first reflective layer on the substrate, wherein the first reflective layer comprises a

silver base alloy; and wherein the silver base alloy of the first reflective layer consists

essentially of silver and 0.005 to 0.4 atom % of bismuth.

- 37. (Cancelled)
- 38. (Cancelled)

39. (Previously Presented) The optical information recording medium of Claim 36,

wherein the first reflective layer is highly reflective.

40. (Previously Presented) The optical information recording medium of Claim 36,

further comprising a second reflective layer on the substrate, wherein the second reflective

layer comprises a silver base alloy; and wherein the silver base alloy of the second reflective

layer consists essentially of silver and 0.005 to 0.4 atom % of bismuth,

wherein the first reflective layer is a semi-transmissive film.

Application No. 10/633,550

Reply to Office Action of April 19, 2007

41. (Previously Presented) The optical information recording medium of Claim 36, wherein the first reflective layer is semi-transmissive.

42. (Cancelled)

43. (Currently Amended) An optical information recording medium, comprising:

a substrate and

a first reflective layer on the substrate, wherein the first reflective layer comprises a

silver base alloy;

and wherein the silver base alloy of the first reflective layer consists essentially of

silver, 0.005 to 0.4 atom % of bismuth and 0.01 to 2 atom % in total amount of at least one

rare earth metal element.

44. (Currently Amended) The optical information recording medium of Claim 43,

wherein the at least one rare earth metal element is Nd.

45. (Previously Presented) The optical information recording medium of Claim 43,

wherein the first reflective layer is highly reflective.

46. (Previously Presented) The optical information recording medium of Claim 43,

wherein the first reflective layer is semi-transmissive.

47. (Cancelled)

48. (Cancelled)

3

49. (Previously Presented) The optical information recording medium of Claim 43, further comprising a second reflective layer on the substrate, wherein the second reflective layer comprises a silver base alloy; and wherein the silver base alloy of the second reflective layer consists essentially of silver, 0.005 to 0.4 atom % of bismuth and 0.01 to 2 atom % in total amount of at least one rare earth metal element,

wherein the first reflective layer is a semi-transmissive film.

- 50. (Currently Amended) The optical information recording medium of Claim 49, wherein the <u>at least one</u> rare earth metal element of the second reflective layer is Nd.
 - 51. (Cancelled)
 - 52. (Cancelled)
- 53. (Previously Presented) The optical information recording medium of Claim 40, wherein the silver base alloy of the second reflective layer consists of silver and 0.005 to 0.4 atom % of bismuth.
 - 54. (Cancelled)
 - 55. (Cancelled)
 - 56. (Cancelled)

Application No. 10/633,550 Reply to Office Action of April 19, 2007

- 57. (Previously Presented) The optical information recording medium of Claim 49, wherein the silver base alloy of the second reflective layer consists of silver, 0.005 to 0.4 atom % of bismuth and 0.01 to 2 atom % in total amount of at least one rare earth metal element.
- 58. (Currently Amended) The optical information recording medium of Claim 57, wherein the <u>at least one</u> rare earth metal element of the second reflective layer is Nd.
 - 59. (Cancelled)
- 60. (Previously Presented) The optical information recording medium of Claim 49, wherein the silver base alloy of the first and second reflective layers consists of silver, 0.005 to 0.4 atom % of bismuth and 0.01 to 2 atom % Nd.
